

SUMP Türkiye Webinar 14

27 March 2024

The 14th SUMP Türkiye Webinar was held on 27th March 2024, titled "Planning for a Sustainable and Resilient Urban Mobility System – Part 3."

This webinar explored vital insights into resilience and mobility in urban planning, evaluating best practice examples from cities worldwide and assessing their strategies for resilience.

Topics Covered in the 14th Webinar:

- Regulation of vehicle access in smart, resilient cities
- Discussion of sustainable urban mobility systems and their interconnectedness
- Emphasis on the role of Intelligent Transport Systems (ITS) in the planning process
- Focus on active mobility planning to enhance resilience in urban networks
- Introduction to Triple Access Planning for providing foresight in an uncertain future
