

İzmir Urban Logistics Workshop 30/05/2024

On May 30th, İzmir Metropolitan Municipality, along with experts from Panteia and Rupprecht, held the İzmir Urban Logistics Workshop. The afternoon session stood out for its productivity, enriched by the participants' active contributions, new ideas, and insights.

The workshop focused on addressing the complex challenge of balancing cargo deliveries, air quality, cars, pedestrians, residents, and retailers. Together with participants, discussions centered on how to intelligently reorganize urban spaces to enhance eco-friendly delivery systems in the city center. The aim was to explore improvements to the current logistics setup while maintaining a people-centered and sustainable urban environment.
