Goal Setting Technical Workshop

27/07/2024

The Goal Setting Technical Workshop was successfully held with broad participation from the members of the SUMP İzmir Inter-Unit Working Group, featuring in-depth discussions. Participants prioritized İzmir's objectives, evaluated potential mobility indicators for these goals, validated current state values, and determined potential target values. This collaborative effort aims to outline the future process for confirming goals related to İzmir's future urban mobility.

We sincerely thank all participants for their active contributions! We are excited to continue this progress in upcoming workshops.
