

SUMP Türkiye Volunteers to Meet University Students Tomorrow!

11 March 2024

For a more liveable future and sustainable urban life, SUMP Türkiye Volunteers will meet with the academic community tomorrow!

The SUMP Türkiye project, focused on sustainable urban mobility, is bringing together all city stakeholders to promote zero-carbon, clean, environmentally friendly, and cost-effective transportation alternatives through the "SUMP Türkiye Volunteers" initiative. The academic community, businesses, NGOs, and public institutions are joining forces to become SUMP Türkiye Volunteers, working towards a better future. Together, they are taking responsibility for their cities alongside their residents.
